Schedule of Breed Codes

Amendment Summary

13 Jan 2026

BOM & BMB Listing for American Bombay (BMB) removed; breed combined with Bombay (BOM). (Ref: 26-001.)

31 Jan 2025

BEN & CAS Added blue and charcoal colours. Updated some colour codes and word order of colour descriptions. (Ref: 25-003.)

20 Jan 2024

2.12 Standardising tabby pattern registration wording across multiple documents. (Ref: 22-011.)

PER / EXO Removed bicolour, harlequin, and van entries, and added a new 'and white' section at the end of the listing. (Ref: 24-005.)

SBI & TEM Added cinnamon series colours. (Ref: 24-006.)

BUR & MDY Expanded russet series colours. (Ref: 24-007.)

11 Jan 2022

Section 3 Added breed codes for new breed, Devon Rex Longhair. (Ref: 21-011)
DRX / DRL

Section 3 Added AOC entries for Toyger and Singapura. (Ref: 21-031)
TYG & SIN

03 Jan 2021

Section 3 Golden tabby code changed from P/F to F/N. (Ref: 20-013.)
BRI

Section 3 Added breed codes for British Longhair, changing to a three-column format. Change indications (underlines) from 13 Jan 2020 amendments retained on BRI listings. (Ref: 21-002.)
BRI / BRL

Amendment Process

- 0.1 Suggestions for minor amendments (minor errors or omissions which do not affect the intent) are welcome and may be submitted to the Secretary. These will usually be incorporated the next time the page is reissued.
- 0.2 Proposals for significant amendments should also be submitted to the Secretary but will require a process of assessment and approval prior to incorporation.

1. Notes on the Schedule

Breed Codes for Registration Purposes

- 2.1 Breed codes marked with an asterisk in the Schedule of Breed Codes are for registration purposes only. These breed codes do not as yet have an official NZCF standard of points. Cats registered with breed codes thus marked shall be exhibited together with other exhibits of the applicable breed registered with the letter 'Z' of that breed, i.e., they shall be exhibited as AOC of their own breed with **no challenge certificates**.

Challenge Certificates

- 2.2 Breed codes with no annotations whatsoever are all entitled to challenge certificates with the exception of those detailed in para 2.3 below.
- 2.3 Challenge certificates are not offered to:
- a. breed code AOV L - any other variety LH breed/type division,
 - b. breed code AOV S - any other variety SH breed/type division,
 - c. any LH and SH breeds with colour suffix 'Z',
 - d. any variants of a breed, or
 - e. kittens.

Red and Cream

- 2.4 **LH:** Cream and red tabby / cream and red self registrations (DUAL) must use their dual registrations, (refer Registration Rules, para 6.4). Non-agouti crossed with non-agouti: Any red progeny born of non-agouti parents, but with the phenotype of an agouti, may be registered as a red tabby, but shall have the registration certificate endorsed with the genotype of non-agouti recorded, e.g., PER F/D (na) and not just the tabby breed code, but they will be exhibited and judged as the 'tabby' phenotype.
- 2.5 **SH:** Cream and red tabby / cream and red self registrations (DUAL) must use their dual registrations, e.g., SIA F/D (na) or SIA F/G (na) or OSH F/D (na) and not just the tabby breed code, but they will be exhibited and judged as the 'tabby' phenotype.

Non-Silver Progeny from Silver Lines

- 2.6 **LH:** Non-smoke, non-shaded, non-silver tabby progeny from silver lines must use their dual registration, e.g., PER (s), and not just the non-silver breed code, but they will be exhibited and judged as the non-silver phenotype.
- 2.7 **SH:** Non-smoke, non-shaded, non-silver tabby progeny from silver lines must use their dual registration, e.g., OSH (s), and not just the non-silver breed code, but they will be

exhibited and judged as the non-silver phenotype.

Any Other Colour

- 2.8 All longhair breeds have the colour suffix 'Z' for 'any other colour' of the applicable breed for show purposes. All colours and patterns of these breeds that do not already have their own breed code listed shall be exhibited under the applicable breed code with colour suffix 'Z'. If no breed code exists they must be shown as AOV L.
- 2.9 All shorthair breeds have the colour suffix 'Z' for 'any other colour' of the applicable breed for show purposes. All colours and patterns of these breeds that do not already have their own breed code listed shall be exhibited under the applicable breed code with colour suffix 'Z'. If no breed code exists they must be shown as AOV S.

Generation 1

- 2.10 **LH:** All generation 1 cats which exhibit the phenotype of their breed must be exhibited according to their registration code which may be breed AOV L or may be the breed code of their designated breed, depending on the breeding programme.
- 2.11 **SH:** All generation 1 cats which exhibit the phenotype of their breed must be exhibited according to their registration code which may be breed AOV S or may be the breed code of their designated breed. Gen 1 Bombay, Burmilla, Sphynx, Tonkinese, Selkirk Rex, and La Perm may all be registered or re-registered according to their designated breed code and exhibited accordingly, provided they are not variants.

Tabby Patterns

- 2.12 The tabby pattern (classic [cl], mackerel [mk], spotted [sp], ticked [tk]) of all agouti cats shall be recorded at the date of registration except where the tabby pattern is unable to be determined in pointed or high-white patterned cats (van or harlequin). In addition the registered pattern of adult cats shall be stated on show entry forms and entered in judges books.

Dilute Modifier (Caramel)

- 2.13 In all breeds which recognise the dilute modifier, caramel cats must be registered with their base colour. Dilute modified (caramel) cats are to be shown collectively as 'caramels' (dilute modified) unless the breed has accepted base colours for showing purposes, e.g., apricotpoint Siamese or apricotpoint Birman.

Breed Specific

Persian Group

- 2.14 Persian progeny from Exotic matings also carry dual registration, e.g., PER A (EXO A) but are exhibited and judged as Persians.

Manx Group

- 2.15 All Manx, Cymric, Isle of Man SH and LH, and Tasman Manx, Tasman Cymric, and Tasman Isle of Man SH and LH, follow the established breed code system for registration purposes.

Abyssinian Group

- 2.16 Abyssinian progeny from Abyssinian x Somali matings are registered as Abyssinian with suffix (I), e.g., ABY (I), and are exhibited and judged as Abyssinians.

Rex Breeds and Sphynx

- 2.17 Cornish Rex, Devon Rex, Selkirk Rex, and Sphynx have individual breed codes for all colours and patterns for registration purposes only. For show purposes these cats must be exhibited as breed CRX Cornish Rex, breed DRX Devon Rex, breed SRX Selkirk Rex, and breed SPH Sphynx. Breed codes for registration purposes are not shown in the Schedule of Breed Codes. Those registered as CRX Z, DRX Z, SRX Z, and SPH Z must be exhibited as breed CRX, breed DRX, breed SRX, or breed SPH and their challenge status is unaffected, as all colours are accepted.

Balinese/Javanese

- 2.18 Variant (shorthaired) Balinese and Javanese are registered and shown as Siamese and Oriental but with an (I) as a mandatory part of the code.

Tonkinese

- 2.19 Tonkinese are allocated breed code TON and are registered according to colour, however all Tonkin

ese shall have their colour expression (sepia [se] for Burmese expression, mink [mn] for Tonkinese expression, and pointed [pt] for Siamese expression) recorded at registration and in addition the registered colour expression of adult cats shall be stated on entry forms for exhibition and entered in the judges books.

Bengal/Cashmere

- 2.20 Bengal/Cashmere are registered according to colour, however Snow Bengal/Cashmere shall have their colour expression (sepia [se] for 'Burmese' expression, mink [mn] for 'Tonkinese' expression, and pointed [pt] for 'Siamese' expression) recorded at registration and in addition the registered colour expression of adult cats shall be stated on entry forms for exhibition and entered in the judges books.

- 2.21 Shorthair offspring from a Cashmere parent are registered and shown as Bengal but with an (l) as a mandatory part of the code.

Ragdoll

- 2.22 Mink and sepia Ragdolls shall have their colour expression (sepia [se] for 'Burmese' expression, mink [mn] for 'Tonkinese' expression) recorded at registration and in addition the registered colour expression of adult cats shall be stated on entry forms for exhibition and entered in the judges books.

Burmilla SH and LH / Tiffany

- 2.23 Burmilla (BML)/(BLH) and Tiffany (TIF) are registered according to colour, however all Burmilla SH and LH, and Tiffany with sepia colour expression shall have their colour suffixed by (se) at registration and in addition the registered colour expression of adult cats shall be stated on entry forms for exhibition and entered in the judges books.
- 2.24 In colour descriptions the sepia expression of black should be described as seal, e.g., TIF s/FE is a black tortie silver tabby but TIF s/FE (se) is a seal tortie silver tabby.

Maine Coon

- 2.25 All polydactyl Maine Coons shall be registered as MCO (p). This is for registration purposes only as polydactyl and non-polydactyl Maine Coons compete in the same classes at shows.
